TAU - Office of the President
Date: *09/28/23* Time: *1:35*

I. IDENTIFYING INFORMATION

- **Title of Proposal**
TAU-National Cleanup Drive 2023
- **Participants**
All Employees, students and stakeholders
- **Proposed Venue**
University Wide
- **Event Date**
September 28, 2023
- **Proponent**
Jeffrey John R. Yasay
Contact: 09285128618
- **Implementing Agency**
Tarlac Agricultural University
- **Cooperating Agencies/Organizations**
DENR, LGU Camiling, TAU-UFA, TAU-FA, TAU-NASA and TAU-MPC
- **Budgetary Requirements**
P129, 000.00 – T-shirt

II. RATIONALE

As The Tarlac Agricultural University (TAU) community prepares to actively participate in the **9th National Clean-Up Drive** in September 2023, it is critical that the university instills a profound a sense of responsibility to maintain cleanliness and environmental health among its stakeholders in its relentless drive to revitalize the natural beauty and ecological balance inside the campus and within its immediate surroundings.

This university initiative provides an opportunity for TAU teaching and non-teaching staff and students to join together in a shared commitment to improve and support the sustainable development of TAU's microclimate zones. Such collaborative effort is necessary to make a lasting impact on future generations and contribute to the conservation of natural resources.

This critical role that each member of the TAU community plays in attaining environmental goals, demonstrates the university's long-term and unquestionable dedication to sustainability via solid waste management, and consequently emphasizes a legacy of stewardship of a cleaner, healthier environment for the benefit of all.

For TAU, a truly global Asian university, to make strides in its vision to connect with the world, it must model a framework for partnerships anchored on promotion of eco-consciousness and viable resource management that also advocates for ethical and science-based production especially in agro-industrial centers.

Page 2 for National Cleanup Drive 2023 - Sept. 28, 2023

Tarlac Agricultural University (TAU) held a highly successful cleanup drive across its campus, with broad participation from students, faculty, staff, and partnering organizations such as DENR, LGU Camiling, TAU-Faculty Associations, TAU-Non-Academic Staff Association, and TAU-Multi-purpose Cooperative. The event, which aimed to enhance environmental awareness and campus cleanliness, drew a strong turnout, demonstrating the commitment of the TAU community to maintaining a sustainable and eco-friendly environment.

Throughout the day, participants engaged in a thorough campus-wide cleanup effort, collecting a significant amount of waste, which was carefully sorted for recycling and disposal. Approximately 40% of the collected materials were designated for recycling, reinforcing TAU's dedication to responsible waste management. In addition to cleaning efforts, the event included workshops and seminars conducted in collaboration with DENR and LGU Camiling, where participants learned about waste reduction practices and environmental laws. These sessions were well-received, with many attendees expressing a renewed commitment to sustainable practices within and beyond the campus.

The cleanup drive not only resulted in a visibly cleaner campus but also deepened a culture of environmental stewardship at TAU. The event successfully raised awareness, instilled a stronger sense of responsibility among participants, and laid the groundwork for continued collaboration in promoting sustainable practices. TAU's dedication to environmental health and community engagement was powerfully demonstrated through this event, marking a significant step forward in the university's sustainability initiatives.
