Php 18,500.00

II. RATIONALE

Climate change explains how changes in environmental conditions are caused by human activities. These activities include how we manage our resources or how we interact with mother nature.

Nowadays, there is a need to capacitate our leaders to help our community to get the best information as their guide in decision-making for projects and programs in their barangay.

* For off-campus trainings with student involvement, all requirements pursuant to CHED Memorandum Order No. 63, s. 2017 must be complied with and this Form must be signed by the VP-AA.

Republic of the Philippines

TARLAC AGRICULTURAL UNIVERSITY

Camiling, Tarlac

Providing the community with sufficient opportunities to acquire knowledge, skills, and commitment to work on improving and preserving the environment and natural resources of San Jose, Mayantoc, Tarlac for future generations. Moreover, being more environmentally aware could help to reduce some of the effects of climate change, as well as reduce our impact on the planet.

III. OBJECTIVES

A. General Objective

This training orientation briefing aims to enhance the knowledge on environmental awareness on climate change and adaptation strategies among community leaders of Barangay San Jose.

B. Specific Objectives

1. To enhance awareness in environmental awareness, especially on climate change.
2. To strengthen farmers' adaptation on climate change.
3. To create linkages among leaders.

IV. COURSE CONTENT

1. Definition of Good Environmental management.
2. Adhere effects of environmental degradation.
3. How to mitigate climate change?
4. Steps in environmental management.

V. TRAINING METHODOLOGY/IMPLEMENTING STRATEGIES

The training will be conducted face to face at the Calao Building Sitio Calao, San Jose, Mayantoc, Tarlac for the convenience of the participant and this will be a whole day activity. Training documents and materials will be assisted and provided by the College extension coordinator and to ensure the smooth implementation of the activity the overall facilitator will be assigned to the Department of Forestry. After the activity, all forms and documents will be consolidated by the Department extension coordinator and will be submitted to the College Extension Coordinator and to the Department of Extension and Training for the record.

On May 25, 2023, the Department of Forestry, in collaboration with the College Extension Coordinator, Ms. Lyka Abayon-Sia, from the College of Agriculture and Forestry (CAF), conducted a one-day seminar on Climate Change and Environmental Laws. This significant event took place in Brgy. San Jose, Mayantoc, Tarlac, drawing a lively and engaged audience from the community.

The seminar was enthusiastically attended by barangay officials, led by Brgy. Captain Gene Dela Cruz, along with representatives from various people's organizations and selected community members. The attendees participated actively, showing a strong commitment to understanding the urgent issues surrounding climate change and the importance of environmental laws in protecting their community.

This seminar is part of the Barangay Integrated Development Framework Plan (BIDFPP), a comprehensive strategy aimed at enhancing sustainable development within the barangay. Tarlac Agricultural University (TAU) has committed to fulfilling this plan under its Adopt-a-Barangay Program. Through this program, the university aims to foster partnerships with local communities to promote sustainability and environmental resilience.

The seminar covered key topics including the effects of climate change on local ecosystems, policies aimed at protecting natural resources, and specific laws that safeguard environmental health and public welfare. Participants engaged in discussions about practical measures they could adopt in their daily lives to mitigate environmental damage, and the role of local governance in enforcing these laws. The program encouraged an exchange of ideas, highlighting the community's shared responsibility in creating a sustainable future.

In conclusion, the seminar on Climate Change and Environmental Laws successfully raised awareness among Brgy. San Jose residents. It underscored TAU's dedication to building resilient communities through collaborative efforts with local and government partners. With the active involvement of the barangay officials, people's organizations, and the community, the event marked a pivotal step towards achieving a sustainable, eco-friendly future for Brgy. San Jose.
