

On November 24, 2023, TAU's Gender and Development Office, in partnership with the College of Agriculture and Forestry (CAF), hosted a Seminar on Gender and Mental Health Integration with a Focus on Teenage Pregnancy at the TAU Amphitheater.

This event aimed to raise awareness, empower, and inspire students through essential discussions on reproductive healthcare. By addressing mental health and reproductive health challenges, particularly among the youth, the seminar sought to provide students with the knowledge and guidance needed for informed decisions, fostering a healthier and more resilient generation.
