## TAU FRESH MARKET

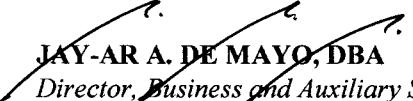

The **TAU Marketing and Fresh Market** serves as Tarlac Agricultural University's initiative to promote food accessibility and affordability within the campus community. Operated under the university's production projects, it offers fresh, high-quality agricultural produce and processed goods directly from TAU's own farms and enterprises. By selling products at prices lower than those in commercial markets, the initiative helps address staff hunger and food insecurity while supporting sustainable local production and income-generating activities for the university.

## HARVEST HAPPINESS PROGRAM

### Description:

Tarlac Agricultural University's (TAU) Department of Research and Development (DRD) has successfully launched the "Harvest Happiness Program," an initiative that offers free vegetable picking every Friday, open to all TAU employees, students, and external visitors, particularly focusing on reaching the less fortunate. Beyond the immediate benefit of providing fresh produce, the program stands as a shining example of environmental stewardship and sustainable practice within the university and the wider community. It aims to promote sustainable agriculture that offers nutritional food options to the community and contribute to the government's poverty alleviation and food security programs.

## Vegescape Garden

### Description:

The Tarlac Agricultural University (TAU), through its Department of Research and Development (DRD), has launched an inspiring initiative: the Vegescape Garden. More than just a patch of soil, this project is a vibrant testament to environmental stewardship and a practical model for sustainable agriculture. By focusing on high-value crops and upland vegetables, the Vegescape Garden offers tangible benefits to the local community while doubling as an essential hub for edu-tourism.
