

University : Tarlac Agricultural University
Country : Philippines
Web Address : <http://tau.edu.ph>

Description:

The TAU Sustainability team conducts an inventory to update the previous campus assessment and establish a baseline for the University's Climate Action Plan. The analysis will utilize the Clean-Air Cool-Planet software, focusing on the defined boundaries of the campus as determined by the Campus Sustainability Committee. These boundaries were selected based on the University's capacity to influence various campus areas and the central administration's control over these units. Additionally, the plan will address water pollution control measures.
